I am a seasoned Full-Stack .NET Software Engineer with over 8 years of experience in designing, developing, testing and maintaining Frontend and Backend applications. Experienced in Microservices and Monolithic Architectures.

Backend Experience: C#, .NET 8, OOP, Microservices, REST API, TDD, Web API, EF Core, Dapper, Automapper, NUnit, XUnit, Specflow. REST/SOAP (JSON & XML). TDD, BDD, DDD and more. Git & GitHub for version control. Respecting SOLID principles, Clean Code and Design Patterns.

Frontend Experience: ReactJS, NextJs, Redux, React Hooks, React Native & Expo, Javascript, Typescript, JQuery, MaterialUI, Bootstrap, Foundation, Styled-components, LESS & SASS, HTML5 & CSS3 and more...

Database Experience: Building and maintaining relational and non-relational databases using, SQL/T-SQL, and SQL Server following the Code First approach. Optimising SQL queries, writing triggers and stored procedures. Azure Cosmos DB, MongoDB and Table Storage.

Azure Cloud and DevOps: Hands-on with Azure, Azure Functions, App Services, Storage Accounts, Service Bus, SQL Servers, Cosmos DB and more. Experience with Docker, AKS Clusters, and Building DevOps CI/CD. Understanding of Microservice Architecture and containerisation using Docker in Azure AKS Kubernetes clusters. Very enthusiastic about building Azure DevOps CI/CD pipelines with YAML. Infrastructure as code using Terraform.

Currently, working in a small team of 5 people, strictly following Agile methodologies (Scrum) with 2 weeks sprints. Excellent problem-solving and communication skills. Comfortable working in big teams, small teams and even individually.

PROFESSIONAL EXPERIENCE

FULL-STACK SOFTWARE ENGINEER
Auderli | Brighton, United Kingdom
15/11/2021 – NOW (2 YEARS)

- Led the development of front-end and back-end solutions using ReactJS, .NET Core, and C#.
- Contributed to cloud and infrastructure projects, leveraging Azure and DevOps practices.
- Implemented CI/CD pipelines, microservices architecture, and container orchestration with Kubernetes.
- Also contributing to Agile Methodologies

C# and .NET Core, using CQRS and Event Sourcing for managing events. Working with EventStore, SQL, TSQL, Azure Cosmos and Redis Cache as databases. Behaviour Driven Development and Test Driven Development.
Testing with NUnit, XUnit & Specflow for specification testing (Given, When, Then). Using Assert First Technique Mocking objects with NSubstitute. Experience with SQL and MySQL.

SOFTWARE ENGINEER
Sainsbury's | Coventry, United Kingdom
03/12/2018 – 15/11/2021 (3 YEARS)

- Worked on various projects utilizing C#, .NET Core, ReactJS, and SQL, focusing on developing scalable and robust applications.
- Gained significant experience in cloud services, including Azure and AWS, to optimize application deployment and performance.

At Sainsbury's I worked on multiple projects mostly with C#, .Net Core, ReactJS, React Hooks, Redux, SQL, TSQL, EF Core, Dapper, MongoDB, Azure, AWS, S3, SNS, Lambda, DevOps, AKS, Docker, Signal R, Key vaults, AAD, Redis Cache, Container Registry, App Services, Azure Cosmos Db, Service Bus, Event Hubs, REST API's, SOAP, OOP and more

JUNIOR SOFTWARE ENGINEER
SoftUni | Sofia, Bulgaria
05/12/2016 – 21/12/2018 (2 YEARS)

Design and deliver backend RESTFULL API's using .NET Core and NodeJS + ExpressJS. Build and release frontend applications with ReactJS, Angular and Angular 2+. Experience with MVC, MVVM, REST, SOAP XML, JSON, YAML, Git, GitHub and more.

Optimizing SQL queries and working on relational databases with SQL, Dapper and EF Core. Quickly deliver quality code and meet deadlines on multiple projects using different technologies, languages and frameworks.

Education

15/09/2014 - 25/05/2018 (4 years)
Bachelor's degree in informatics
South-West University "Neofit Rilski"

05/12/2016 - 21/02/2018 (2 years)
Graduated C# and JavaScript Engineer
Softuni "Private Software University"
